Weekly drop in events and dedicated point of contact

Engagement with community council, councillors, MSPs and MP
Information Events

We are providing information on:

• The nature of the existing waste water systems
• Options that were considered for accommodating growth
• Our proposals for upgrading the waste water treatment facilities
• Our work with Moray estates to build a new pipeline

We want to hear your views on:

• How we manage the extra traffic during the projects
• How we minimise the impact on the community during the work
• How we minimise the impact on the environment during the work
• How we make sure we leave all areas we are working in the same, or better, condition than before we started
UV installation at WWTW

Extension of outfall

New pipelines

Upgrade of WWTW
Ultraviolet light is a disinfection process that will enhance the environment and help protect dolphins in the Moray Firth.
Starts - September 2016 and be completed by March 2017.
Extension of the sea outfall pipe
### Ardersier Catchment

**Figure 6.1:** Options for location of a new WwTW, including possible discharge locations.

#### 6.2.2 Sites for a new WwTW

A short list of potential sites for a new WwTW was drawn up from an assessment of the local area and land-use.

Consultation was undertaken with key stakeholders (SEPA, SNH, and The Highland Council Planning and Archaeology unit) to determine what the main constraining issues would be for each site and the short list of options was refined accordingly.

The shortlisted sites for further discussion were as follows:

- **Option 1:** Blackcastle / Druminding Quarries
- **Option 2:** Existing Ardersier WwTW or immediate vicinity
- **Option 3:** Inverness Airport Industrial Estate or Fisherton Area
- **Option 4:** Delvies Area - west of Nairn and north of the B9062 road
- **Option 5:** Existing Ardersier WwTW or immediate vicinity with outfall locations for Options 1 and 4

An overall layout drawing capturing all options is presented in Figure 6.1. Possible outfall locations were identified for each option.

### Supporting Development

**Inner Moray Firth Proposed Local Development Plan**

November 2013

**Scottish Water**
Trusted to serve Scotland
A to B  Mid July 2016 to end of Oct 2016
B to C  End Oct 2016 to end Jan 2017
