Kippford Site Investigations

Dear Customer,

Kippford Wastewater Treatment Works – Site Investigations

I am writing regarding site and ground investigation work which will be starting this week and lasting for around 4 weeks in the land around Merse Way.

This follows on from further discussions on 21st January with the Merse Way Association, Kippford Association, Rough Firth, Jubilee Path, Riverview and Colvend Community Council where we discussed the need to carry out site investigations and extending them to include another site based on the feedback at the meeting. The minutes of these discussions will be included in the Kippford Association newsletter.

These investigations are being carried out to look at the feasibility of two different potential sites for a new Wastewater Treatment Works which is required to help protect and improve the Bathing Water quality in the Urr Estuary. The existing works on Rough Firth cannot treat the effluent to the required standard.

The investigations will involve drilling into the ground to better understand the conditions and what is possible on each site. Whilst we will try and keep any disruption to a minimum, you will likely hear and see our teams working in the two locations on the map overleaf. We would like to apologise for any inconvenience.

If you have any questions or concerns about the project, please do not hesitate to contact me on my details below.

Kind regards,

Adam Warner
