Water**

Trusted to serve Scotland

YOUR CHARGES EXPLAINED

SEPTIC TANK
DE-SLUDGING
CHARGES
2021/22

Every day, we deliver **1.44 billion** litres of clear, fresh drinking water so it's there day or night whenever you turn on the taps.

We remove and treat **983 million** litres of waste water every day to help protect the natural environment.

We provide a vital public service to more than **5 million** customers and more than **2.5 million** homes across Scotland. We work 24 hours a day, 365 days a year to keep the water cycle running.

Our focus is on delivering an excellent service, providing great value for money, and reducing our effect on the environment.

The charges you pay allow us to operate and improve water and waste water services in Scotland. You use these services in almost every aspect of your daily life.

Septic tank de-sludging services

Scottish Water offers a range of septic tank de-sludging services. These services are available to household and business customers who own a private septic tank which takes standard waste, such as sewage and waste water. If you meet all our conditions, the charges detailed in this leaflet will apply.

Types of service

There are three levels of service that are available to all septic tank owners in Scotland. These are:

Scheduled service: When you sign a contract with us we will de-sludge your septic tank at agreed intervals. A planned schedule of regular de-sludging services helps to keep your charges – and our costs – down. This service is charged at the approved rates in operation at the time of each de-sludging service.

Unscheduled service: If you don't want to enter into a contract with us, we will endeavour to de-sludge your septic tank within **5 working days** of your request where possible. This service is more expensive to provide than the scheduled service, so the charges are higher.

Urgent response service: If you need your septic tank de sludged urgently we'll aim to attend within **2 working days** of your request where possible. This urgent response service is the most expensive for us to provide and this is reflected in the charge. We may have to charge you the actual cost of doing the work if this is more than the charges shown.

If we are unable to accommodate the above timescales, you will be notified at the time of booking.

Payment arrangements for septic tank services

For all types of service we may require payment in advance, you will be notified of this when the de sludging is confirmed by Scottish Water. We will not provide any de sludging service to a customer who has failed to pay a previous charge for a de sludging service. Payments can be made online at www.scottishwater.co.uk/payabill

De-sludging charges

The septic tank de sludging charges detailed apply for the financial year 1 April 2021 to 31 March 2022.

Household charges

The charges below are based on one septic tank being de sludged. The septic tank can serve up to 5 houses and must meet all the basic conditions.

Household charges

| | |
|-----------------|--|
| Scheduled | £193.50 |
| Unscheduled | £277.40 |
| Urgent response | £399.10 or actual cost if this is more |

Charges for multiple and larger tanks

Prior to any service being delivered, upon request we will provide an estimate in the following circumstances:

- where more than 5 houses are connected to your tank.
- where your tank size is greater than 9m³ (9,000 litres).
- where your property has multiple tanks that require de-sludging at the same time.

Please note, Scottish Water is unable to provide a de-sludging service for any septic tank which takes waste as a result of non-household or industrial processes.

Business charges

| | |
|-----------------|--|
| Scheduled | £211.70 |
| Unscheduled | £293.70 |
| Urgent response | £423.80 or actual cost if this is more |

The standard charges are for a single tank up to 9m³, provided the tank does not take industrial waste.

There will also be an additional charge where the volume of the tank is greater than 9m³ and this is based per m³.

If you need to have multiple tanks on your property de-sludged at the same time, we will provide an estimate for de-sludging your tanks.

| | |
|--------------------------------------|--------|
| Additional charge per m ³ | £20.40 |
|--------------------------------------|--------|

We may impose a charge if we arrive at the property but can't de-sludge the septic tank for reasons beyond our control. This is classed as an abortive visit.

| | |
|-----------------|--------|
| Abortive visits | £70.40 |
|-----------------|--------|

VAT will be added where applicable.

The following factors are taken into consideration to help us carry out a range of de-sludging services:

- the weight and manageability of the lid of your tank (i.e. capable of being moved or lifted by one person).
- the position of your tank (i.e. accessibility and/or distance and height from the tanker).
- the available access for our vehicles and parking facilities.

Your tank lid must be readily accessible, free from any apparent damage and in an unlocked position. If your lid does not meet this criteria, we will not be liable for any damage caused. If these conditions are not met and the situation is considered to be unsafe, we would reserve the right to refuse de-sludging services. For full details of our conditions or any additional information about septic tanks please call our **Customer Helpline** on **0800 0778778**.

Help us to help you

Water plays a vital role in our daily lives. We use it virtually every moment, every day. It's a precious resource and we all have a part to play in caring for it.

- Don't flush single-use wipes, sanitary items and other bathroom waste items down the toilet as these often contain plastic. You should put these items in the bin and only flush toilet paper, pee & poo.
- Recycle or put all cooled fat, oil and grease in a bin, not down the sink[^].
- Water is always worth saving, whatever the weather. It will help keep your energy costs down too. To find out how much water your household uses, visit **www.getwaterfit.co.uk**
- Top up from the tap - use a refillable bottle and enjoy Scotland's great-tasting water fresh from the tap. It's good for the planet, your pocket and you.

To find out more, visit **www.scottishwater.co.uk**

[^]Please check with your local council/waste contractor for info on how to recycle or dispose of used fat, oil and grease in your area.

Keeping you informed

You can keep up to date about our work or service updates, such as having no water supply, in your area visit: www.scottishwater.co.uk/updates

Our services – your rights

Our customers and communities are at the heart of everything we do. We always aim to deliver on our promises and are always looking at how we can improve the service and the value that we provide. It is important that we aim to provide you with a great customer experience – and that when we say we will do something, we do it.

We want you to be aware of our promises and your rights under our service standards. To find out more, visit www.scottishwater.co.uk/ourpromises
