

**Scottish  
Water**

Trusted to serve Scotland

# **YOUR CHARGES EXPLAINED**

SEPTIC TANK  
DE-SLUDGING  
CHARGES  
2022/23

We deliver **1.53 billion** litres of clear, fresh drinking water every day so it's there whenever you turn on the taps.

We protect the environment by removing and treating **1.08 billion** litres of waste water every day.

Our vital public services help more than **5 million** customers and over **2.6 million** households across Scotland go about their day-to-day lives.

Our focus is on delivering an excellent service, providing great value for money, and reducing the effect we have on the environment. We work 24 hours a day, 365 days a year to keep the water cycle running.

The charges you pay allow us to operate and improve water and waste water services in communities across Scotland.

## Septic tank de-sludging services

Scottish Water offers a range of septic tank de-sludging services. These services are available to household and business customers who own a private septic tank which takes standard waste, such as sewage and waste water. If you meet all our conditions, the charges detailed in this leaflet will apply.

### Types of service

**There are three levels of service that are available to all septic tank owners in Scotland. These are:**

**Scheduled service:** You can submit an application for service to us and we will de-sludge your septic tank at agreed intervals. A planned schedule of regular de-sludging services helps to keep your charges – and our costs – down. This service is charged at the approved rates in operation at the time of each de-sludging service. If you cancel your scheduled service within the 14 days prior to your septic tank being de-sludged you will be responsible for the payment of the charge.

**Unscheduled service:** If you would rather not set up a regular scheduled service with us, you can opt for our unscheduled service. This service offers a one-off de-sludge service within 28 working days of your request where possible. You will be notified of the date for de-sludging your tank before the work is carried out. This service is more expensive to provide than the scheduled service, so the charges are higher.

**Urgent response service:** If you need your septic tank de-sludged urgently we'll aim to attend within **2 working days** of your request where possible. This urgent response service is the most expensive for us to provide and this is reflected in the charge. We may have to charge you the actual cost of doing the work if this is more than the charges shown.

If we are unable to accommodate the above timescales, you will be notified at the time of booking.

## Payment arrangements for septic tank services

Charges are payable 30 days from the date of invoice. We will not provide any de-sludging service to a customer who has failed to pay a previous charge for a de-sludging service. Payments can be made online at [www.scottishwater.co.uk/payabill](http://www.scottishwater.co.uk/payabill)

## De-sludging charges

The septic tank de-sludging charges detailed apply for the financial year 1 April 2022 to 31 March 2023.

## Household charges

The charges below are based on one septic tank being de-sludged. The septic tank can serve up to 5 houses and must meet all the basic conditions.

### Household charges

Scheduled	£210.90
Unscheduled	£297.40
Urgent response	£428.60 or actual cost if this is more

## Charges for multiple and larger tanks

Prior to any service being delivered, upon request we will provide an estimate in the following circumstances:

- where more than 5 houses are connected to your tank.
- where your tank size is greater than 9m<sup>3</sup> (9,000 litres).
- where your property has multiple tanks that require de-sludging at the same time.

Please note, Scottish Water is unable to provide a de-sludging service for any septic tank which takes waste as a result of non-household or industrial processes.

### Business charges

Scheduled	£220.50
Unscheduled	£306.00
Urgent response	£441.70 or actual cost if this is more

**The standard charges are for a single tank up to 9m<sup>3</sup>, provided the tank does not take industrial waste.**

There will also be an additional charge where the volume of the tank is greater than 9m<sup>3</sup> and this is based per m<sup>3</sup>.

If you need to have multiple tanks on your property de-sludged at the same time, we will provide an estimate for de-sludging your tanks.

Additional charge per m <sup>3</sup>	£25.60
--------------------------------------	--------

We may impose a charge if we arrive at the property but can't de-sludge the septic tank for reasons beyond our control. This is classed as an abortive visit.

Abortive visits	£80.20
-----------------	--------

VAT will be added where applicable.

**The following factors are taken into consideration to help us carry out a range of de-sludging services:**

- the weight and manageability of the lid of your tank (i.e. capable of being moved or lifted by one person).
- the position of your tank (i.e. accessibility and/or distance and height from the tanker).
- the available access for our vehicles and parking facilities.

Your tank lid must be readily accessible, free from any apparent damage and in an unlocked position. If your lid does not meet this criteria, we will not be liable for any damage caused. If these conditions are not met and the situation is considered to be unsafe, we would reserve the right to refuse de-sludging services. For full details of our conditions or any additional information about septic tanks please call our **Customer Helpline** on **0800 0778778**.

## Help us to help you

Water is a precious natural resource and we must all look after it. When nature calls, there's a world to save - so **join the wave**:

- Only flush the 3Ps - toilet **p**aper, **p**ee & **p**oo.
- Don't flush single-use wipes, period products or other bathroom waste items as these can contain plastic. Put them in the bin instead.
- Recycle or put all cooled fat, oil and grease in a bin, not down the sink<sup>^</sup>.
- Top up from the tap - use a refillable bottle and enjoy great-tasting water from the tap. It's good for you, your pocket and the planet.
- Water is always worth saving - there are lots of simple ways to save water that can help keep your energy costs down. Find out how much water you use in your household, visit: **[www.getwaterfit.co.uk](http://www.getwaterfit.co.uk)**

To find out more, visit **[www.scottishwater.co.uk](http://www.scottishwater.co.uk)**

<sup>^</sup>Please check with your local Council/waste contractor for info on how to recycle or dispose of used fat, oil and grease in your area.

## Keeping you informed

You can keep up to date about our work or service updates, such as having no water supply, in your area - visit: [www.scottishwater.co.uk/updates](http://www.scottishwater.co.uk/updates)

## Our services – your rights

Customers and communities are at the heart of everything we do. We always aim to deliver on our promises and improve the service and value we provide. It is important that we aim to provide you with great customer experience – and when we say we will do something, we do it.

To find out more about your rights under our service standards visit:
