

# using water wisely

## tip 3

### Boil the kettle with only the water you need.

This will save water and mean your kettle will take less time to boil - so it reduces the amount of energy needed to make it boil as well.

save water... save energy...  
save the environment

It's not about the water we use, it's about the water we waste. For more information about using water wisely in and around the home visit [www.scottishwater.co.uk](http://www.scottishwater.co.uk) or call our **Customer Helpline** on **0800 0778778**.
