

# Taking care of your sewer network

## River Kelvin environmental improvements

- We are about to start a project near the Bandstand (near the rear entrance of the School).
- We are upgrading the waste water infrastructure to improve the environment and water quality of the River Kelvin.
- Once complete, this new infrastructure will help prevent items which are wrongly flushed down the toilet – items like rags, baby wipes, plastic cotton buds, etc. - from overflowing into the River Kelvin during severe storm events.
- To make space for the new infrastructure we require to remove some trees. New trees will be planted upon project completion. We have also carried out ecology surveys and tree surveys before we started the project. Careful consideration has been taken in order to minimise the number of trees being removed.
- Hillhead school have voted for a fox to be carved from a tree that is required to be removed as they have a family of foxes that visit the school. Kelvin Park Early Years have voted for a Kingfisher.
- We shall be presenting to the school and centre to the pupils in February 2019 to provide more information about the project and about H&S best practice.
- A section of footpath near the bandstand is required to be closed throughout the duration of the works for the safety of the public. Please see page two for the location of the footpath closure.

## Temporary closure of footpath from 19th February to June 2019.

**FOOTPATH  
CLOSED**

- Please follow one of the shared paths diversion routes highlighted green on the map below.
- Thank you for your patience whilst we carry out this essential upgrade to the sewer network.
- We shall reinstate the area with grass seed and plant trees once it is completed. Scottish Water's alliance partner amey Black and Veatch (aBV) will carry out the work which is anticipated to be completed by June 2019
- Please keep up to date by visiting

## Location of site cabins near the school rear entrance .

- We have designed the layout to ensure the rear entrance of the school will remain open as usual.
- Please look out and adhere these signs approaching the site.

We shall aim to arrange deliveries to the site compound area out with the school start and finish times to minimise disruption. We shall also have a vehicle marshal to aid any construction machinery drivers reversing across the shared path area. Please pay attention to the sign shown on the left and take extra care. Please see the map below for the site set up.

## Shared path in the park to be temporarily narrowed next to the school .

- We have located the cabins on the wide tarmac section into the park to avoid disturbing the grassed areas of the park.
- The shared path will be narrowed as per the same site set up during the Summer of 2018 as shown below: -

- Please look out and adhere the signs and share with care.

Location of site compound area near the rear entrance of the school.
