WGM B
JOINT VENTURE

Taking care of your waste water network

Traffic Management – Forestry Road Route

- To allow heavier vehicle access, the northern forestry road route was surveyed and discussed with local landowners.
- Agreement has been reached that heavy vehicle access will be from the B839 onto the Donich Park forestry owned road to the construction site.
- Larger plant deliveries, including cranes and excavators, will be on articulated HGVs.
- Speed Limit signs will be visible on approach and reinforced through site rules printed on driver cards.
- The speed limit for Donich Park to the Construction site will be reduced for all vehicles.
- Clear signage will be in place, workers will be fully briefed to be aware of livestock and other road users and instructed to drive according to road conditions.
- Residents adjacent to the access route and construction site have been fully informed of vehicle movements and will continue to be updated as the project progresses.
